the volume challenges dominant narratives of progress with a rich range of investigations of local struggles from the global south which are based on original ethnographic research the chapters take a point of departure in ideas and concepts developed by the pioneering anthropologist eric r wolf in europe and the people without history and emphasize the relevance and usefulness of applying wolf to contemporary contexts as such the collection contributes to knowledge of dynamic relationships between local agency in the global south and broader political and economic processes that make

people without history this shows global power as both excluding local groups at the same time as conditioning local struggles and the forms that social organization takes contributors are paul stacey joshua steckley nixon boumba marylynn steckley ismael garcia colón inge merete hougard gustavo s azenha ioannis kyriakakis raquel rodrigues machaqueiro tirza van bruggen and masami tsujita

hegemony tells the story of the drive to create consumer capitalism abroad through political pressure and the promise of goods for mass consumption in contrast to the recent literature on america as empire it explains that the primary goal of the foreign and economic policies of the united states is a world which increasingly reflects the american way of doing business not the formation or management of an empire contextualizing both the iraq war and recent plant closings in the u s noted author john agnew shows how american hegemony has created a world in which power is no longer only shaped territorially he argues in a sobering conclusion that we are consequently entering a new era of global power one in which the world the us has made no longer works to its singular advantage

for centuries the asians chinese indians muslims and others have been bystanders in world history now they are ready to become co drivers asians have finally understood absorbed and implemented western best practices in many areas from free market economics to modern science and technology from meritocracy to rule of law they have also become innovative in their own way creating new patterns of cooperation not seen in the west will the west resist the rise of asia the good news is that asia wants to replicate not dominate the west for a happy outcome to emerge the west must gracefully give up its domination of global institutions from the imf to the world bank from the g7 to the un security council history teaches that tensions and conflicts are more likely when new powers emerge this too may happen but they can be avoided if the world accepts the key principles for a new global partnership spelled out in the new asian hemisphere

this work looks at events which have had fundamental implications for the geopolitical relations in and with the asia pacific region it covers issues such as regional definition the emergence of regional integration the role of japan china russia and india and security and trade

now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war for each theory greg cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the

theory's implications for restraining international violence among the questions he explores are: are humans aggressive by nature? do individual differences among leaders matter? how might poor decision making procedures lead to war? why do leaders engage in seemingly risky and irrational policies that end in war? why do states with internal conflicts seem to become entangled in wars with their neighbors? what roles do nationalism and ethnicity play in international conflict? what kinds of countries are most likely to become involved in war? why have certain pairs of countries been particularly war prone over the centuries? can strong states deter war? can we find any patterns in the way that war breaks out? how do balances of power or changes in balances of power make war more likely? do social scientists currently have an answer to the question of what causes war? Cashman examines theories of war at the individual, substate, nation, state, dyadic and international systems level of analysis. Written in a clear and accessible style, this interdisciplinary text will be essential reading for all students of international relations.

The signing of the Paris Agreement in 1973 ended not only America's Vietnam War but also Richard Nixon's best laid plans. After years of secret negotiations, threats of massive bombing and secret diplomacy designed to shatter strained communist alliances, the president had to settle for a peace that fell far short of his original aims.

She reveals how conviction style politicians have appeared in the U.S. and U.K. at the same time. Individuals who articulated similar ideas that adapted liberal ideology to shifting circumstances and who achieved fundamental change at critical moments in their nations' histories.

Shatters the conventional belief that American foreign policy was borne out of a reaction to Pearl Harbor, revealing instead a rich history of debates over the direction of American international relations, many of which persist to this day.

Challenging previous accounts, Megargee shatters the myth that German generals would have prevailed in World War II if only Hitler had not meddled in their affairs. Instead, he observes that the military's strategic ideas were no better than Hitler's and often were worse. 20 photos.

Osgood focuses on major campaigns such as Atoms for Peace, People to People, and cultural exchange programs, drawing on recently declassified documents that record U.S. psychological operations in some three dozen countries. He tells how U.S. propaganda agencies presented everyday life in America to the world: its citizens living full, happy lives in a classless society where economic bounty was shared by all. Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion. He also reexamines

the early years of the space race focusing especially on the challenge to american propagandists posed by the soviet launch of sputnik

in this provocative and readable volume eleven leading constitutional authorities challenge business as usual in american foreign policymaking for far too long they contend americans have acquiesced to presidential claims to sweeping executive powers in foreign affairs thanks to imperial minded presidents a weak willed congress and neglectful scholars these authors forcefully argue that the president is not the supreme crafter of foreign policy and that congress must provide more than a rubber stamp for the president s agenda unilateral presidential control of foreign relations they warn can pose a grave threat to our nation s welfare and is simply without constitutional warrant combining constitutional theory with keen historical insights these authors illuminate the roots of presidential abuse of executive power and remind us of the past and potential costs of such disregard for our unique system of checks and balances an essential guide for all concerned citizens and members of congress this volume should help revive a proper understanding of this crucial dimension of american democracy

what is the future of the american west this book look at works of utopian dystopian and apocalyptic science fiction to show how narratives of the past and future powerfully shape our understanding of the present day west

this book explores the visual and material cultures of presidential commemoration memorials and monuments libraries and archives and the problematic ways in which presidents themselves have largely taken over their own commemoration the author sees these various commemorative sites as playing a key role in the construction of our collective political and cultural self images and as another sign of our preoccupation with celebrity culture ultimately he contends these presidential temples reflect not only our civil religion but also the extraordinary expansion of executive authority and presidential self commemoration since fdr
